

Systems & project directory.

38

Systems, projects and modules
with scope, status and preview links.

SYSTEMS & PROJECT DIRECTORY

Every entry. With its scope and status.

A directory of systems, projects and modules in CODA's portfolio and ecosystem, with a separate status for each entry.

01 Published release or update

A specified deployment exists; acceptance, integration, training and operation require separate verification.

02 Preview or development

An interface or scope in development or trial; it does not imply a complete product for every use.

03 Project-specific readiness

Available functions, operating readiness and delivery plans are defined when reviewing the organisation's needs.

How to read an entry

Name and affiliation → description → key workflows → status and operating requirements → website. Arrange a demonstration and suitable scope with the CODA team.

Edition prepared: 9 October 2026. Status is reviewed when an offer is requested.

— DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

Aamal Hub

01

Portfolio affiliation: CODA / Enterprise Management

An Arabic enterprise workspace connecting finance, sales, purchasing, HR and communications with Odoo records.

Workflows: Finance & Invoicing • Sales & Purchasing • Human Resources • Messaging & WhatsApp

Status: Published release

Integrates with Odoo; workflows and interfaces are defined in the delivery scope.

hub.go.iq ↗

Qiyada

02

Portfolio affiliation: CODA / Enterprise Management

An Arabic workspace for executive and parliamentary offices, combining decisions, directives, citizen affairs, correspondence and meetings.

Workflows: Executive Brief • Decision Cards • Organization Follow-up • Files & Correspondence

Status: Published release

Roles and approval workflows are configured around office procedures.

qiyada.go.iq ↗

Shuon

03

Portfolio affiliation: CODA / Enterprise Management

A system organizing citizen requests and public cases, from receipt and assignment to follow-up, closure and reporting.

Workflows: Request Intake • Assignment & Follow-up • Correspondence & Visits • Reporting & Audit

Status: Published release

shuon.go.iq ↗

— DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

Official Correspondence

04

Portfolio affiliation: CODA / Enterprise Management

An internal correspondence system prepared for the General Company for Military Industries, organizing official documents and approval workflows.

Workflows: Official Documents • Approval Workflow • Viewing & Printing • Roles & Permissions

Status: Development edition

Operation and acceptance are scoped with the recipient organisation.

Arrange a preview through the CODA team.

CODA Human Resources

05

Portfolio affiliation: CODA / Enterprise Management

An Arabic HR platform bringing employee records, attendance, payroll and recruitment into one workspace.

Workflows: Employee Files • Attendance & Leave • Payroll • Recruitment & Evaluation

Status: Published release

Attendance, payroll and permission policies are configured for the organisation.

hrm.go.iq ↗

AlWakeel

06

Portfolio affiliation: CODA / Enterprise Management

A system for company and agent services, subscriptions, tickets, forms, authorizations and documents.

Workflows: Company Services • Support & Tickets • Subscriptions • Forms & Authorizations

Status: Development edition

Arrange a preview through the CODA team.

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

Bunyan

07

Portfolio affiliation: CODA / Buildings & Real Estate

An Arabic system for contractors connecting projects, contracts, measurements, payment certificates, materials and expenses with accounting and follow-up.

Workflows: Contracts & Measurements • Costs & Expenses • Materials & Stores • Milestone Follow-up

Status: Published release

Applications include following up the Aamal Plus building project.

bunyan.go.iq ↗

OSOS

08

Portfolio affiliation: CODA / Buildings & Real Estate

A platform for facilities, buildings, service requests, complaints, work orders and invoices, with user roles.

Workflows: Service Requests • Work Orders • Maintenance & Follow-up • Reporting & Permissions

Status: Published release

osos.ac.com.iq ↗

Amlak

09

Portfolio affiliation: CODA / Buildings & Real Estate

Property, development, broker, commission and financial reporting management, with Arabic interfaces and mobile browsing.

Workflows: Properties & Developments • Brokers & Commissions • Maps • Financial Reports

Status: Published release

amlak.go.iq ↗

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

Sakan

10

Portfolio affiliation: CODA / Buildings & Real Estate

A platform in development for housing and property services, with functions and workflows defined around project needs.

Workflows: Property Interfaces • Local Development • Product File Required

Status: Development edition

Functions and launch plans are defined within the project scope.

Arrange a preview through the CODA team.

Hala Restaurant Management

11

Portfolio affiliation: CODA / Commerce & Hospitality

Restaurant operations linking orders, dining room, kitchen, sales and inventory, with an Android access application in development.

Workflows: Point of Sale • Kitchen & Dining Room • Inventory & Purchasing • Branches & Reports

Status: Development & trial

The Android app is in trial; printing and payments are tested on site devices.

hala.go.iq ↗

Rofoof

12

Portfolio affiliation: CODA / Commerce & Hospitality

Retail sales and inventory, with offline sales and web, Windows and Android editions under testing.

Workflows: Sales & Barcodes • Inventory & Purchasing • Shifts & Cash Desk • Offline Operation

Status: Web deployed; trial packages

Windows and Android editions are experimental; device readiness is reviewed before operation.

rofoof.go.iq ↗

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

Hotels Iraq

13

Portfolio affiliation: GO / Commerce & Hospitality

An Iraqi accommodation booking ecosystem covering hotels, apartments, farms and retreats, with partner dashboards and related travel services.

Workflows: Search & Booking • Accommodation Types • Partner Dashboard • Travel Services

Status: Published release

Bookings and services depend on participating partners and approved integration.

hotels.iq ↗

RihlaGo

14

Portfolio affiliation: GO / Commerce & Hospitality

An intercity transport booking pathway within hotels.iq, including trip search and seat selection.

Workflows: Routes • Trip Schedules • Seat Booking

Status: Ecosystem workflow

A transport workflow within Hotels Iraq.

hotels.iq/rihlaggo ↗

Qishla

15

Portfolio affiliation: CODA / Commerce & Hospitality

Ticketing, point of sale and bookings for the Qishla heritage site, combining sales, reporting and user management.

Workflows: Tickets & Booking • Point of Sale • Reports • Permissions

Status: Published release

Booking and digital sales services are defined around the site operating plan.

qishla.go.iq ↗

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

Zi

16

Portfolio affiliation: Aamal Group / Commerce & Hospitality

An Arabic B2B wholesale and purchasing platform, combining RFQs, commercial orders, sourcing and import services.

Workflows: B2B Marketplace • Requests for Quotation • Commercial Orders • Supply & Shipping

Status: In development

Launch plans and market scope are defined before commercial operation.

zi.iq ↗

GoVisa

17

Portfolio affiliation: GO / Commerce & Hospitality

The foundation of an Arabic visa operations platform, with internal catalog management, tasks, tickets and team follow-up.

Workflows: Catalog Management • Tasks & Tickets • Internal Offers • Request Tracking

Status: Foundation in development

The customer journey and payment, communication and document integrations are being completed.

visa.go.iq ↗

Sofoof

18

Portfolio affiliation: CODA / Education & Health

School management and family communication connecting student affairs, attendance, fees, accounts and assignments.

Workflows: Students & Admissions • Fees & Accounts • Attendance • Assignments & Communication

Status: Published release

sofoof.go.iq ↗

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

Rushd

19

Portfolio affiliation: CODA / Education & Health

An educational platform with an interactive whiteboard, assignments, teacher assistance, files and learning sessions.

Workflows: Interactive Whiteboard • Assignments • Teacher Assistant • Sessions & Devices

Status: Preview deployed

The Android edition is part of the preview; AI services depend on activation.

rushd.go.iq ↗

Nabdh

20

Portfolio affiliation: CODA / Education & Health

An Arabic hospital-management project for patients, appointments, invoicing and audit trails, with a pathway for intelligent-assistance integration.

Workflows: Patients & Appointments • Invoices • Permissions • Audit Trail

Status: Prototype

A prototype; healthcare use requires specialist evaluation and appropriate approval.

Arrange a preview through the CODA team.

MedIQ

21

Portfolio affiliation: CODA / Education & Health

A pharmaceutical ecosystem in development, including pharmacy sales, inventory, purchasing, cash reporting and B2B commerce.

Workflows: Point of Sale • Batches & Expiry • Purchasing • Financial Reports

Status: Preview edition

Launch and fully offline operation are being completed.

Arrange a preview through the CODA team.

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

CODA Gym

22

Portfolio affiliation: CODA / Education & Health

A server for gym branches, users, roles, brand settings and subscriptions.

Workflows: Gym Branches • Users & Roles • Subscriptions • Brand Settings

Status: Development edition

Client application, sales and comprehensive operating functions are being completed.

Arrange a preview through the CODA team.

FAIZ

23

Portfolio affiliation: CODA / Smart Operations

An industrial IoT platform for assets, sensors and alerts, with configurable sector modules.

Workflows: Sensor Data • Alerts • Assets & Sectors • Reporting & Permissions

Status: Development & integration

Integration is tested with the sensors and devices specified for each project.

faiz.go.iq ↗

CODA Flow

24

Portfolio affiliation: CODA / Smart Operations

A platform for digital displays, content, scheduling, devices, sites, buildings and floors.

Workflows: Content & Scheduling • Displays & Devices • Sites & Floors • Design & Reporting

Status: Published release

Displays and devices are tested in the target operating environment.

cflow.go.iq ↗

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

CODA Access & Attendance

25

Portfolio affiliation: CODA / Smart Operations

Visitor, employee, attendance and gate-device management, with licensing, reports and audit.

Workflows: Visitors & Badges • Attendance • Gates & Devices • Reports & Licenses

Status: Published release

Device and protocol compatibility is defined in the integration plan.

caccess.go.iq ↗

Mawaqif

26

Portfolio affiliation: CODA / Smart Operations

Parking and valet management, collection, subscriptions, reporting, branch dashboards and platform oversight.

Workflows: Entry & Exit • Collection & Reconciliation • Branches & Staff • Reporting & Occupancy

Status: Published release

Printers and gates are tested, and operating-team roles are defined.

mawaqif.go.iq ↗

CODACS Agent

27

Portfolio affiliation: CODA / Smart Operations

Field communications and operations combining voice channels, teams, tasks, work orders and tracking.

Workflows: PTT Communication • Work Orders • Teams & Tasks • Offline Synchronization

Status: Internal trial deployed

An internal trial; iOS support and advanced scheduling are being completed.

agent.go.iq ↗

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

Zuqaq

28

Portfolio affiliation: Aamal Group / Smart Operations

A social navigation app for Iraq, displaying routes and road alerts related to the user's location.

Workflows: Maps & Routes • Road Alerts • Navigation • Location Updates

Status: Published release

Community alerts require verification; driving functions are field-tested.

zuqaq.go.iq ↗

Nidaa

29

Portfolio affiliation: CODA / Aviation

Arabic and English airport passenger announcements, with flight scripts and schedule management.

Workflows: Flight Announcements • Bilingual Scripts • Scheduling • Operations Management

Status: Development edition

Voice rights and integration with announcement systems are reviewed before operation.

nidaa.go.iq ↗

Marasim

30

Portfolio affiliation: CODA / Aviation

VIP travel protocol and lounge management, tracking flights, tasks and operating-team roles.

Workflows: Flights & Protocol • Lounges • Team Tasks • Reporting & Audit

Status: Development edition

Lounge, flight and team-role scope is defined around organisational procedures.

Arrange a preview through the CODA team.

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

Bajat

31

Portfolio affiliation: CODA / Aviation

Staff badge lifecycle, zone and gate access, alerts and approvals.

Workflows: Badges & QR • Zones & Gates • Approvals • Monitoring & Audit

Status: Published release

Operation requires coordination of approvals and integration with the facility.

bajat.go.iq ↗

Hisa

32

Portfolio affiliation: CODA / Public Services

A solution for fuel quotas, distribution records, follow-up and reporting.

Workflows: Fuel Quotas • Distribution Follow-up • Roles & Reports

Status: Release readiness confirmed on request

Release readiness and operating requirements are confirmed when an offer is requested.

hisa.go.iq ↗

AI-Nafitha

33

Portfolio affiliation: CODA / Public Services

A solution for queues and visitor service, organising waiting flows and reporting.

Workflows: Queue Tickets • Service Counters • Queue Displays • Reports

Status: Release readiness confirmed on request

Operating capacity and reporting are defined around site requirements.

cqms.go.iq ↗

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

CYBAR OSINT

34

Portfolio affiliation: CODA / Knowledge & Security

CODA's open-source intelligence (OSINT) system for security agencies and media-monitoring channels. It combines information, maps, events and reports with linked evidence and human review.

Workflows: Situation Room • Maps & Incidents • Sources & Evidence • Reporting & Review

Status: Published release

Coverage is partial; information and evidence undergo human review before adoption.

cn.go.iq ↗

Server Monitoring Center

35

Portfolio affiliation: Aamal Group / Knowledge & Security

A dashboard for group server and service health, capacity and security alerts, with selected indicators displayed within CYBAR OSINT.

Workflows: Service Health • Resources & Capacity • Security Alerts • Backups

Status: Internal operation

An internal operating system for monitoring Group services.

Arrange a preview through the CODA team.

Hala Messenger

36

Portfolio affiliation: Aamal Group / New Platforms

An Arabic messaging app project with direct and group chats, voice messages, media and privacy management.

Workflows: Chats • Groups • Media & Voice • Privacy Management

Status: Development edition

In development; launch plans are defined when release scope is complete.

Arrange a preview through the CODA team.

DIRECTORY / SCOPE & READINESS

Systems & project directory

Each system has its own status; confirm readiness and scope when requesting an offer.

Music Iraq

37

Portfolio affiliation: Aamal Group / New Platforms

An Iraqi music-discovery platform project with a vertical feed, categories, artist profiles and administration.

Workflows: Content Discovery • Categories • Artist Profiles • Admin Dashboard

Status: Development edition

Launch requires completion of content rights and publishing agreements.

Arrange a preview through the CODA team.

Intishar

38

Portfolio affiliation: CODA / Commerce & Distribution

A system for distributing cards and vouchers through agents and points of sale, with wallets, commissions and settlement records.

Workflows: Agents & Points of Sale • Cards & Vouchers • Wallets & Commissions • Settlement & Reporting

Status: Release readiness confirmed on request

Top-up, payment and provider-integration readiness is reviewed before operation.

intishar.coda.com.iq ↗

Intishar / Distribution workflow

Agents and points of sale → cards and vouchers → commissions and settlements. An illustrative workflow; confirm function readiness against the release.

INTEGRATION

Integration with a purpose. Boundaries you can test.

Define where each system starts and ends, what it exchanges, and who owns its decisions and data.

Users

Roles, permissions and clear journeys for teams, supervisors and recipients.

Applications

Systems, interfaces, workflows, notifications and reports.

Integration

Defined interfaces, clear data ownership, validation and error records.

Data & site

Enterprise systems, equipment, sensors and approved sources within scope.

Before approving integration

Review interfaces, protocols, licences, permissions, environment and testing; integration between systems is specified individually.

HANDOVER & SUPPORT

Deliverables are part of solution quality.

Project scope extends beyond functions to documentation, testing, training and operating responsibilities.

01 Documented Scope & Requirements

User needs, scope boundaries, responsibilities and acceptance criteria.

02 Technical Design & Delivery Plan

Components, interfaces, delivery steps and prerequisites.

03 Testing & Acceptance Evidence

Scope-based verification scenarios, issue resolution and approval records.

04 Documentation, Handover & Training

User and operation guidance, training and support defined by contract.

Sustained operation

Support term, channels, response times, backup and hosting are defined in the agreement and vary by solution and organisational needs.

— LET'S TALK ABOUT YOUR PROJECT

Connect the idea to delivery.

Engineering and digital systems working together.
