VIDEO WALLS

A bigger picture. A connected presence.

Combine multiple displays into one visual surface for reception areas, monitoring rooms and exhibitions.

Size options / inches

55"

65"

01 A layout for the space

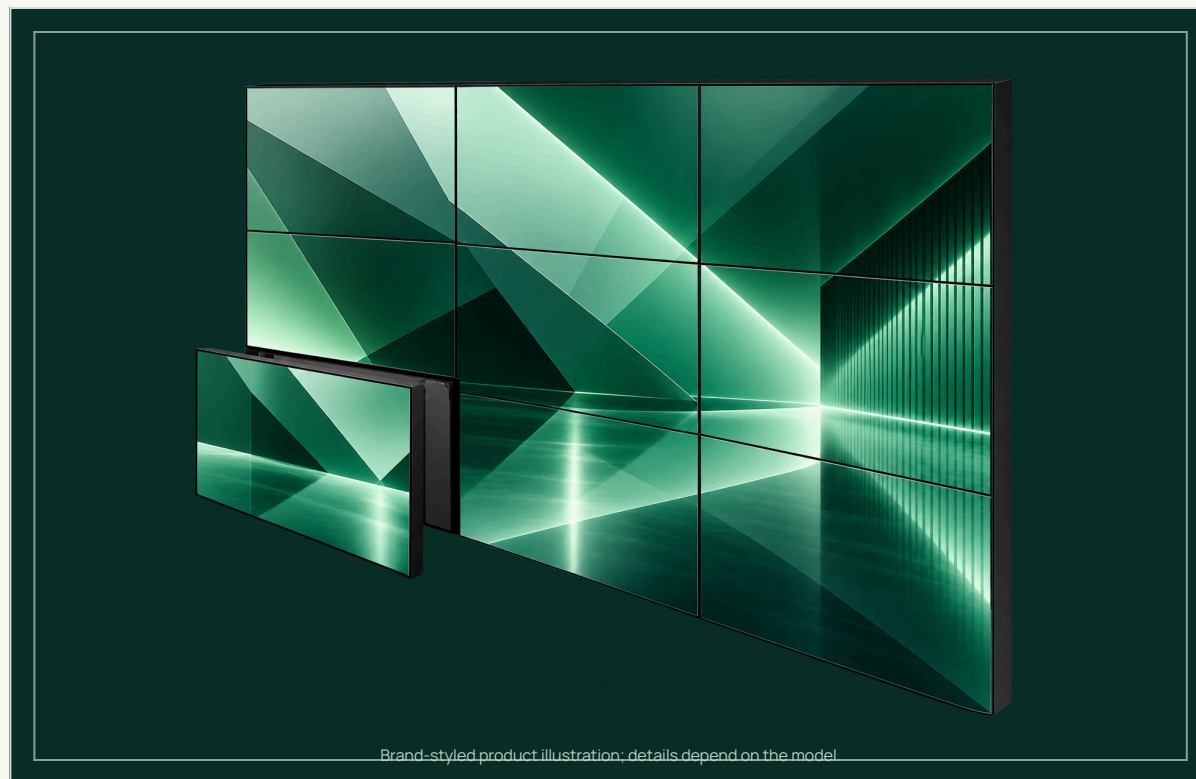

Panel count and arrangement follow the site dimensions.

02 A connected image

Review content mapping, processing and panel seams.

03 Installation design

Specify mounts, cabling and signal sources in the proposal.

WALL-MOUNTED DISPLAYS

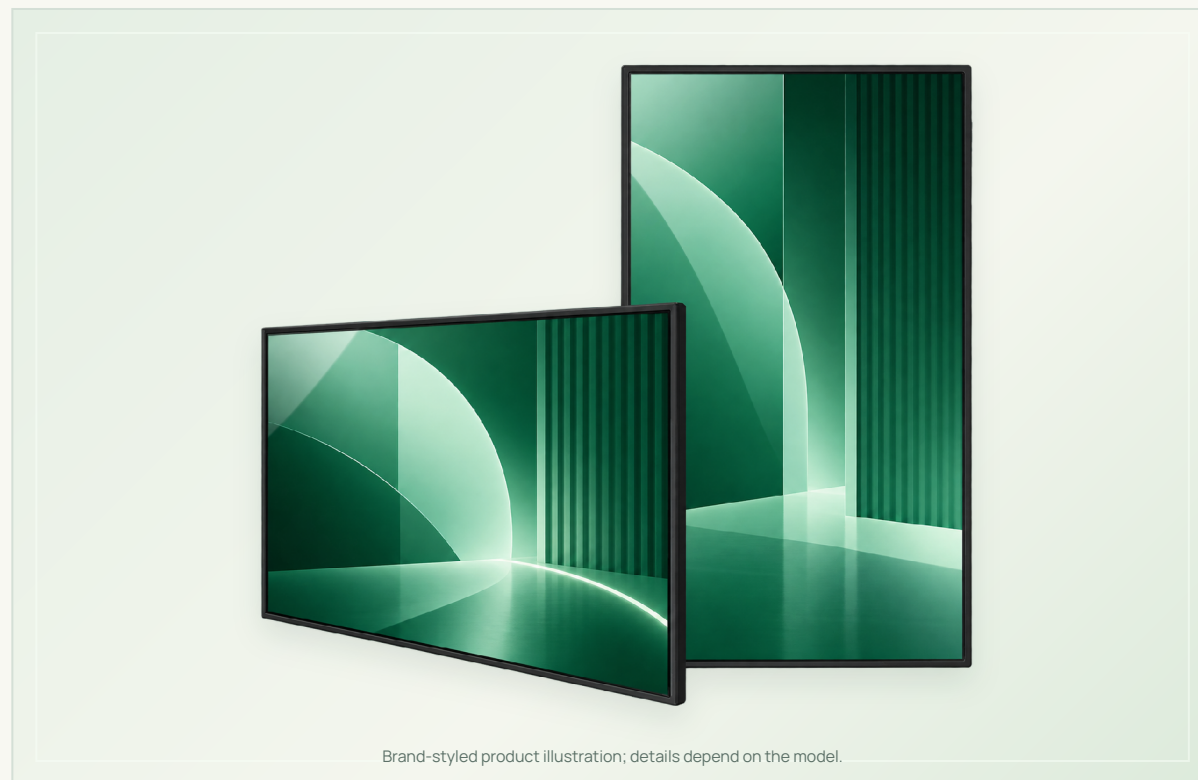

A clear message. Within your space.

Display content, advertising and guidance inside buildings, with landscape or portrait layouts suited to the design.

Size options / inches

- 01 **Use the available space**
Choose placement and height for the viewing position.
- 02 **Content by location**
Welcome messages, commercial offers and internal information.
- 03 **Configuration options**
Mount, orientation and media player depend on the model.

INTERACTIVE DISPLAYS

Ideas on display. Discussion in motion.

Interactive displays for meetings, education and training, bringing presentation and participation together.

Size options / inches

75"

86"

100"

01 Meetings & training

A shared surface for presentations and discussion.

02 Mounting options

Wall or mobile-stand configuration, as specified.

03 Confirm the configuration

Touch technology, operating system and accessories are model-specific.

Brand-styled product illustration; details depend on the model.

ELEVATOR DISPLAYS

Compact spaces. Visible messages.

Compact displays for elevators and waiting areas, showing advertising and building-related information.

Size options / inches

18.5"

21.5"

01 Compact format

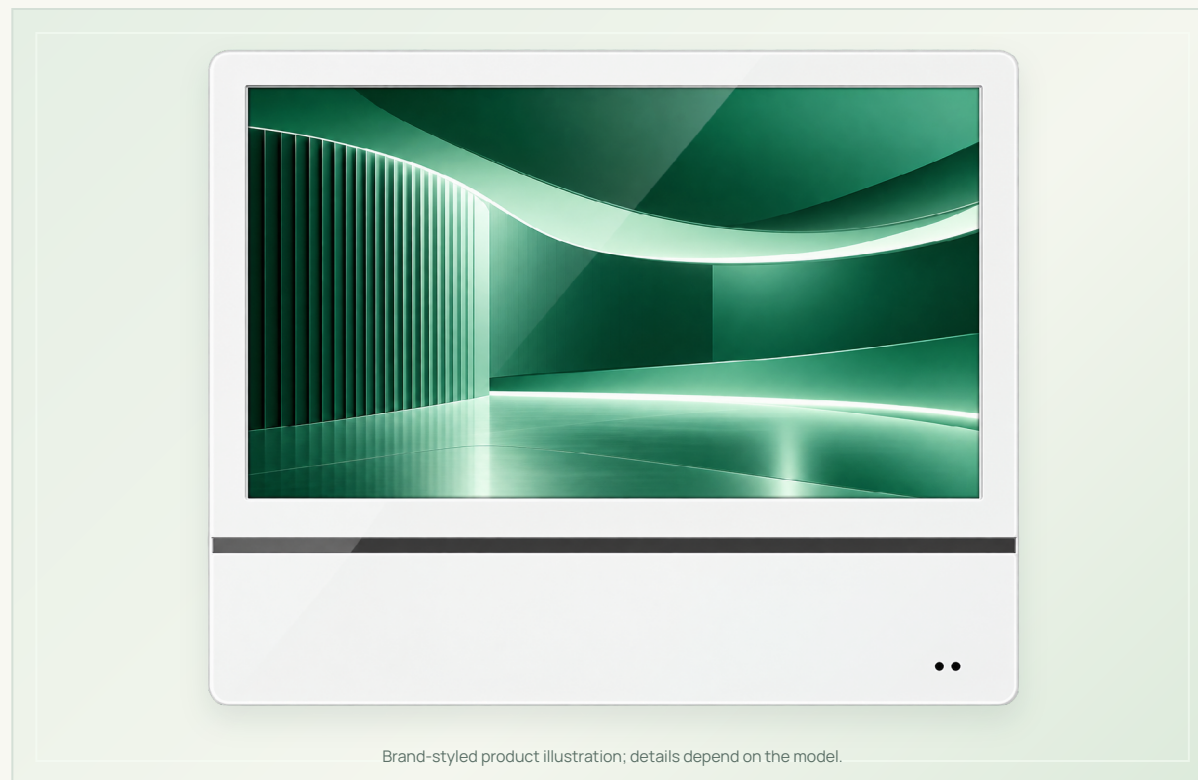

Select the format for the installation position.

02 Building content

Advertising, guidance and recurring messages for occupants and visitors.

03 Coordinate installation

Review power, mounting and connectivity requirements.

PORTRAIT DISPLAY KIOSKS

A standalone presence. Direct interaction.

Portrait display kiosks for entrances, halls and service areas, with touch options according to the required configuration.

Size options / inches

75"

01 Freestanding display

A visual option where wall mounting does not suit the space.

02 Multiple messages

Images, video and divided content, according to player configuration.

03 Interaction design

Touch, application and functions are defined in the project scope.

Brand-styled product illustration; details depend on the model.

ANGLED TOUCH KIOSKS

A closer interface. An easier choice.

Angled touch displays for menus, information and self-service interfaces, according to the selected application.

Size options / inches

43"

55"

01 Menus & information

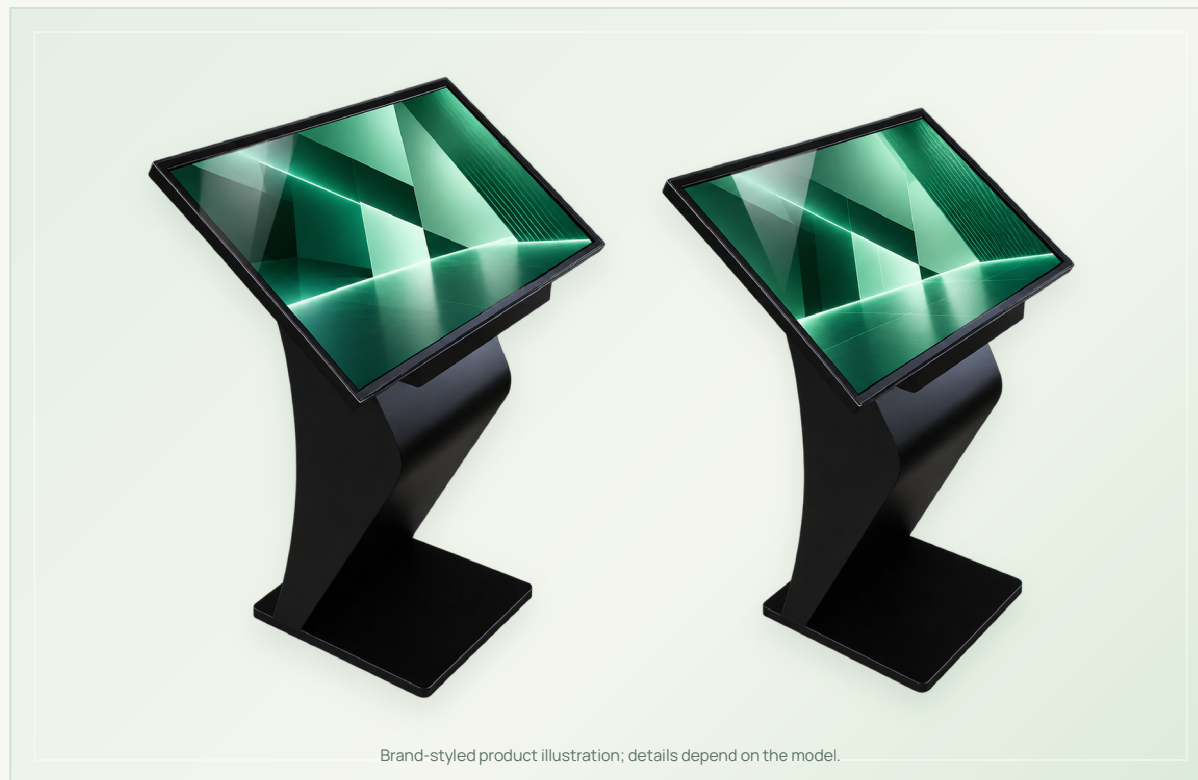

An organised view of available content and services.

02 Interaction position

Review display angle and placement for access.

03 Application integration

Payment, printing and integrations are separately reviewed options.

MOBILE-STAND DISPLAYS

Move the display. With the occasion.

A display with a mobile stand for halls, meetings and events, configured to suit the venue.

Size options / inches

Model-specific

01 Flexible placement

Move the display between suitable presentation areas.

02 A compatible configuration

Review stand load, orientation and mounting system.

03 Select the size

Size and configuration depend on the display and stand.

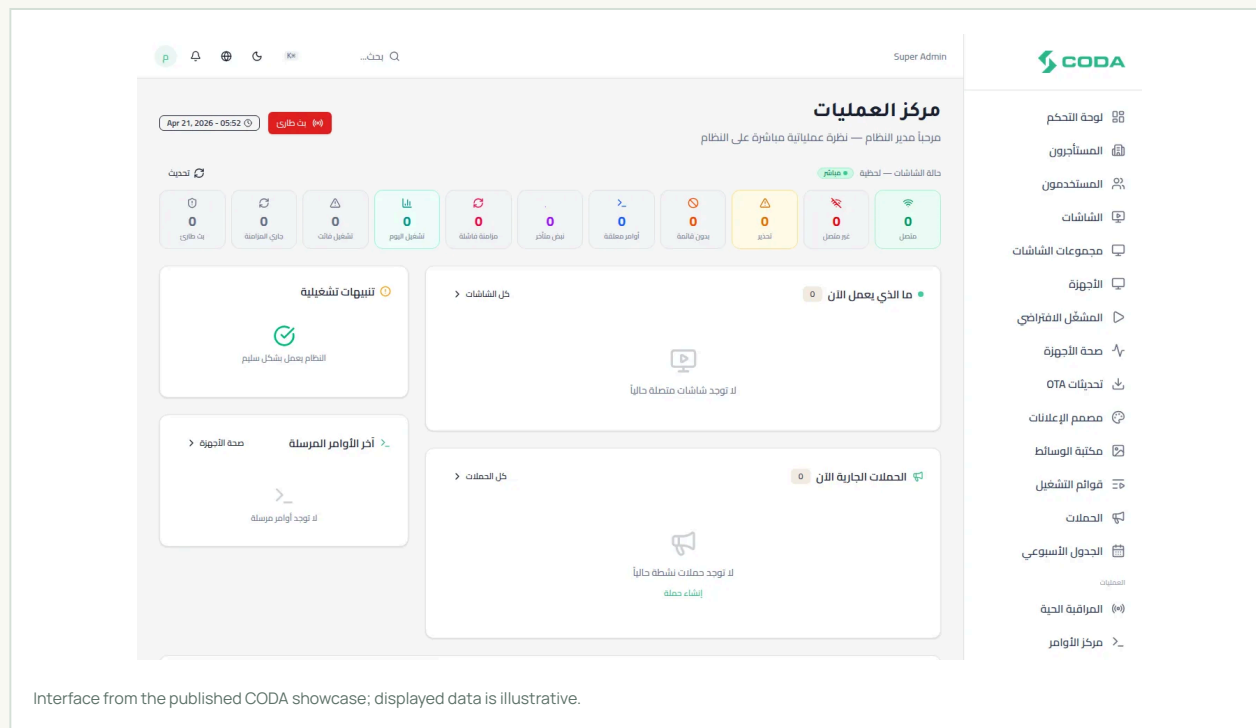

Brand-styled product illustration; details depend on the model.

CONTENT & MANAGEMENT / CFLOW

Multiple displays. Clearer management.

Organise content, scheduling, devices and locations through cFlow, with display and player compatibility reviewed before integration approval.

- 01 **Content & scheduling**
Organise media, playlists and publication timing.
- 02 **Displays & locations**
Organise devices by location, building and floor.
- 03 **Configuration compatibility**
Select player, connectivity and management scope for the project.

SELECTION GUIDE

The right category. The right size.

#	Category	Sizes / inches	Configuration decision
01	Video walls	55 / 65"	Panel count, arrangement and processing
02	Wall-mounted displays	40 / 55 / 65 / 75"	Orientation, mounting and content player
03	Interactive displays	75 / 86 / 100"	Touch, operating system and accessories
04	Elevator displays	18.5 / 21.5"	Mounting position, connectivity and power
05	Portrait display kiosks	75"	Content, touch and service application
06	Angled touch kiosks	43 / 55"	Application, interaction angle and integration options
07	Mobile-stand displays	Model-specific	Stand compatibility, display size and use

Sizes are diagonal measurements in inches. Exterior dimensions and technical specifications depend on the selected model and are confirmed before ordering.

FROM SELECTION TO HANDOVER

A proposal for your site. A clear configuration.

Pricing is quoted according to size, quantity, configuration, installation and required software.

01

Assess the site

Space, viewing distance, lighting and intended use.

02

Define the configuration

Category, size, quantity, mount, touch and integration.

03

Content & integration

Player, content sources, management and connectivity.

04

Install & hand over

Installation, checks and training under the agreed scope.

Request a configuration proposal

Share the project location, display quantity, category, preferred size and mounting method, together with any touch, content-management or integration needs.

CODACS / DISPLAY SOLUTIONS

Let's shape the display around your needs.

Contact CODA to select the category and size, discuss content and configure the site.

Options and specifications follow the model and proposal scope.

Product images are brand-styled illustrations derived from presentation materials; on-screen content is illustrative. The cover is an editorial concept, not documentation of an installed project.
