## COMPANY PROFILE

# A specialist partner in Aamal's ecosystem

CODA combines engineering solutions, systems integration and software development. Its reference portfolio spans safety, security and energy through to enterprise management and digital operations.

Reference image illustrating the field.

## Who We Serve

Institutions, public bodies, developers, factories and service providers.

## How We Create Value

We turn requirements into a clear scope and reviewable deliverables, defining responsibilities and work stages.

### OUR FOCUS

## Engineering and digital systems working together.

A clear specialization, coordinated delivery and follow-up supported by project records.

## CAPABILITIES

# Service portfolio

Services are defined by client requirements, site conditions and the contract scope.

01

## Protection & Safety

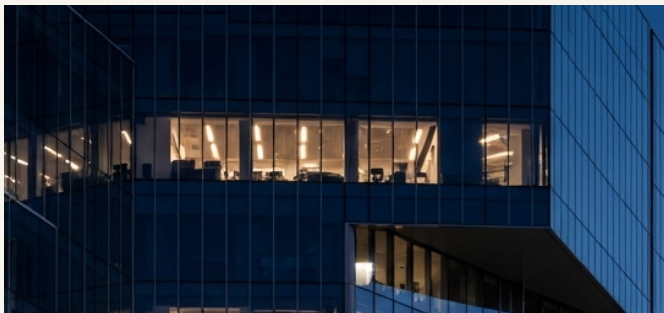

Detection, alarm, suppression and voice evacuation solutions according to the design and scope.

02

## Security & Access Management

Cameras, gates, parking and site-system integration.

03

## Smart Infrastructure

Building management, sensor monitoring, control and automation.

04

## Electrical & Energy

Distribution and control panels, solar energy and engineering services.

05

## Software Development

Arabic systems for sectors and business management.

06

## Supply & Integration

Equipment, technical coordination, testing, handover and training.

## DELIVERY METHOD

# Delivery and handover methodology

Connected stages make the scope, responsibilities and deliverables traceable.

Reference image illustrating the field.

**01****Understand the Need**

Define the problem, users and existing systems.

**02****Design the Solution**

Scope, drawings, data relationships and user experience.

**03****Build & Test**

Supply or development, integration and testing.

**04****Handover & Operate**

Acceptance, training, documentation and contracted support.

## Service Deliverables

**01** Documented Scope & Requirements**02** Technical Design & Delivery Plan**03** Testing & Acceptance Evidence**04** Documentation, Handover & Training

Indicators, timing, warranties and service levels are defined in the proposal and contract; this profile does not imply an overall guarantee.

PROJECT & APPLICATION

# A software ecosystem expanding across sectors

Development portfolio with varied statuses

Reference image illustrating the field.

This edition combines systems in the reference catalog with local projects and conversations. Each entry carries its own status, separating deployment from client acceptance and complete launch readiness.

|                    |                   |                   |                        |
|--------------------|-------------------|-------------------|------------------------|
| 01                 | 02                | 03                | 04                     |
| Sector Requirement | Specialist System | Clear Integration | Acceptance & Operation |

Assigning new products to CODA is a provisional editorial arrangement; ownership, branding and the selling entity must be documented in the release register.

## ENGINEERING PORTFOLIO

# Protection, safety and security

Engineering solutions governed by approved designs, site scope and acceptance testing.

Reference image illustrating the field.

01

## Fire & Safety

Detection, alarm, suppression, evacuation and emergency communications.

02

## Security & Surveillance

Cameras, video management, access and perimeter systems.

03

## Parking & Gates

Coordinating systems, equipment and movement management.

04

## Operations Rooms

Connecting site systems with indicators and procedures.

Standards are defined per project. Product approval or use of a standard does not mean the company itself holds that certification.

## SMART INFRASTRUCTURE

# Smart infrastructure, electrical and energy

Engineering scope ranging from distribution and control to building, asset and energy monitoring.

01

## Electrical & Control

Distribution and control panels and operating interfaces.

02

## Solar Energy

Design, supply and installation based on load and site studies.

03

## Building Management

Connecting sensors, equipment, schedules and operations.

04

## Water & Environment

SCADA pathways and measurement monitoring according to design.

05

## Digital Displays

Screens, content and operations management.

06

## Specialist Supply

Aviation and industrial materials against defined requests and documents.

Solutions are presented as service areas; reference images and brand lists do not establish delivered projects.

## DIGITAL PORTFOLIO

# Current digital portfolio

Systems and initiatives reviewed through working files and Codex conversations, with a status for each entry.

01

## Enterprises

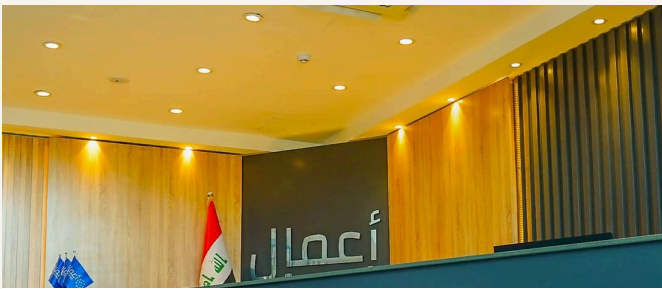

Aamal Hub, Binaa, Qiyada, Shuon, HR and correspondence.

02

## Buildings & Real Estate

Bunyan, OSOS, Amlak and Sakan.

03

## Commerce & Hospitality

Hala, Rofoof, Hotels, Qishla and trade and travel initiatives.

04

## Education & Health

Sofoof, Rushd, Nabdh and MedIQ.

05

## Operations & Aviation

FAIZ, displays, access, parking, field teams, Nidaa and Bajat.

06

## Knowledge & Platforms

CIBAR, information projects and new platforms within the group ecosystem.

The portfolio includes products, internal modules and operational tools. Their total is not a count of completed products or clients.

DIGITAL SOLUTIONS

# Enterprise Management

Status follows the sources at the review date; commercial assignment of new entries must be confirmed before release.

Reference image illustrating the field.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                         |

DIGITAL SOLUTIONS

# Aviation

Status follows the sources at the review date; commercial assignment of new entries must be confirmed before release.

Reference image illustrating the field.

## Nidaa

Nidaa

Development source available

Arabic and English airport passenger announcements, with flight scripts and schedule management.

Flight Announcements   Bilingual Scripts   Scheduling   Operations Management

Voice approval, usage rights and airport loudspeaker integration have not been established.

[nidaa.go.iq](https://nidaa.go.iq) ↗

## Marasim

Marasim

Development source available

VIP travel protocol and lounge management, tracking flights, tasks and operating-team roles.

Flights & Protocol   Lounges   Team Tasks   Reporting & Audit

The local project is named Tashreefat BGW; its development file does not establish a contract or official approval.

## Bajat

Bajat

Updates deployed

Staff badge lifecycle, zone and gate access, alerts and approvals.

Badges & QR   Zones & Gates   Approvals   Monitoring & Audit

Aviation-facility approval and field integrations require separate verification.

[bajat.go.iq](https://bajat.go.iq) ↗

## Public Services

Status follows the sources at the review date; commercial assignment of new entries must be confirmed before release.

Reference image illustrating the field.

## Hisa

Reference; current status unconfirmed

Hisa

A fuel-quota solution in the reference catalog, with a local project record requiring an updated operations file.

Fuel Quotas

Distribution Follow-up

### Roles & Reports

Insufficient evidence was available to confirm official approval or current launch status.

[hisa.go.iq](https://hisa.go.iq) ↗

## Al-Nafitha

Reference; current status unconfirmed

CODA QMS

A queue and visitor-service solution in the reference catalog, with a local project name in the portfolio.

Queue Tickets

Service Counters

## Queue Displays

Reports

Performance and ticket figures in the reference require dated operating data.

[cqms.go.iq](http://cqms.go.iq) ↗

DIGITAL SOLUTIONS

# Knowledge & Security

Status follows the sources at the review date; commercial assignment of new entries must be confirmed before release.

Reference image illustrating the field.

## CYBAR Nexus

CYBAR / Cyber Nexus

A platform integrating information, maps, incidents, infrastructure and reporting, with linked evidence and human review.

Situation Room

Maps & Incidents

Sources & Evidence

Reporting & Review

Coverage is partial; candidate records are not treated as verified events.

cn.go.iq ↗

## Government Structure Information Bank

Government Structure

An information bank within CYBAR Nexus organizing institutions, units, titles, historical appointments and source links.

Institution Tree

Titles & Units

Historical Appointments

Evidence & Sources

A pathway within Nexus, rather than a standalone system or complete government census.

cn.go.iq/government-structure ↗

## Server Monitoring Center

Aamal NOC

A dashboard for group server and service health, capacity and security alerts, with selected indicators displayed within Nexus.

Service Health

Resources & Capacity

Security Alerts

Backups

An internal operations tool; server details and access credentials are excluded from marketing content.

## OPPORTUNITIES &amp; ENGAGEMENT

# Cooperation and development pathways

Opportunities and services become defined scopes once the client need and responsible entity are confirmed.

Reference image illustrating the field.

01

## Digital Transformation & Partnerships

Project briefs tailored to institutional scope, budgets and operating responsibility.

02

## Specialist Supply

Aviation and pharmaceutical raw materials appear in the reference; supply scope and documentation are defined per request.

## First step: a requirements brief.

Location, scope, parties, timing and required deliverables.

Future opportunities and integrations are presented as development pathways, rather than completed projects.

LET'S WORK TOGETHER

# Start with a clear scope

Share your requirements, location and expected timing with the coordination team to identify the right pathway and prepare a scoped proposal.

Reference image illustrating the field.

Baghdad

Contact details come from the reference or project source. Confirm the approved channel and service hours before commercial release.

## EDITORIAL BASIS

# Sources and edition limits

An advanced editorial and design review edition based on previous catalogs and available project sources.

Reference image illustrating the field.

**Company Reference:** coda.pdf; local system sources and Codex conversations

**Review Date:** 8 October 2026, Baghdad time.

**Images:** Reference imagery extracted from previous files. Replace with approved, dated project photographs for delivery case studies.

**Project Status:** Deployment or source availability does not establish complete client acceptance, readiness of every integration or official accreditation.

**Editing:** Unsupported comparative figures, absolute superiority and savings claims were removed. Licenses and relationships require current documentation.

Review these notes and close the verification register before the final commercial edition. Source details and findings are in the accompanying review report.
